U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No. 5

-2-

Serial Number: 09/535453

Art Unit: 3753

This action is responsive to the communication filed November 13, 2000.

Claims 4-7 and 13-16 are withdrawn from further consideration by the examiner, 37 C.F.R. § 1.142(b) as being drawn to a nonelected invention.

Election of Group I was made without traverse in Paper No. 4.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 11-12 are rejected under 35 U.S.C. §102(b) as being anticipated by Swanson. The first, second and third passages are 20, 38 and 76 of Swanson, respectively, and the first and second valves are 40/30 and 70, respectively. Valve 70 opens in response to excess pressure.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the

Serial Number: 09/535453 -3-

Art Unit: 3753

art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 8-10 are rejected under 35 U.S.C. § 103 as being unpatentable over Hertfelder et al in view of Swanson. Hertfelder et al show a similar pilot actuated valve as Swanson but does not have a pressure relief valve. The Hertfelder et al valve opens with no current and is closed when current is applied to the coil. It would have been obvious for one of ordinary skill in the art to have provided a pressure relief valve as taught by Swanson in the valve of Hertfelder et al to desirably provide for high pressure relief in the valve thereof.

Any inquiry concerning this communication should be directed to Examiner Fox at (703) 308-2595 or John.Fox@uspto.gov. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0861. The fax number for Art Unit 3753 is (703) 308-7765. The Supervisory Primary
